

ANIL CHHETRI

Bangalore, India — chettrianil899@gmail.com — +91 98830 43158
linkedin.com/in/anilchettri — github.com/AnilChettri

Professional Summary

Artificial Intelligence and Machine Learning graduate with hands-on experience in Identity and Access Management, SailPoint IdentityNow (ISC), and enterprise authentication systems. Proficient in OIDC, OAuth 2.0, Microsoft Entra ID, Python, SQL, React, and Next.js through academic projects and four internships. Holds SailPoint ISC Leader Certificate. Passionate about IAM governance, IGA, cybersecurity, and building scalable identity solutions.

Technical Skills

IAM Platforms: SailPoint IdentityNow (ISC), Microsoft Entra ID

IAM Concepts: IGA, RBAC, OIDC, OAuth 2.0, MFA, SSO, Provisioning / De-provisioning, Identity Lifecycle Management

SailPoint Skills: ISC Configuration, Identity Lifecycle, RBAC, REST APIs, Access Governance, Compliance Frameworks

Programming & Data: Python, SQL, JavaScript, TypeScript, Pandas, NumPy, Scikit-Learn

Frontend & Backend: React, Next.js, Express.js, REST APIs, Firebase Authentication, PostgreSQL

Tools & Platforms: Git, n8n, Jupyter Notebook, Postman

SailPoint IdentityNow (ISC) – Core Knowledge

- Completed SailPoint IdentityNow (ISC) training and earned SailPoint ISC Leader Certificate (2026), demonstrating foundational IAM governance expertise.
- Built iTrace, an identity security assessment platform integrated with SailPoint ISC concepts including IGA, PAM, authentication, cloud security, and ITDR.
- Implemented assessment questionnaires mapped to compliance frameworks for governance evaluation and access risk scoring.
- Configured identity lifecycle processes including provisioning, de-provisioning, and access requests aligned with IdentityNow governance principles.
- Integrated Microsoft Entra ID with OIDC/OAuth 2.0 using Firebase Authentication for enterprise SSO — consistent with IdentityNow's federation approach.
- Implemented role-based access controls (RBAC) and access profile restrictions aligned with IAM governance and SoD concepts.
- Automated IAM workflows using n8n, replicating IdentityNow-style provisioning and de-provisioning logic for internal identity management.
- Worked with REST APIs for identity data exchange and system integration, mirroring IdentityNow connector and API architecture.
- Developed an AI assistant using RAG to generate identity security recommendations, supporting access review and policy violation insights.

Professional Experience

PySpiders

Data Analyst Intern

Jan 2026 – Apr 2026

Bangalore, India

- Used Python and SQL to clean, transform, and analyse structured datasets for reporting and business insights.
- Worked on machine learning workflows involving preprocessing, model training, and performance evaluation.
- Built reports and performed data analysis for simulated business scenarios.

CyberXDelta

Software & Data Intern

Dec 2025 – Feb 2026

Bangalore, India

- Developed dashboards to monitor system performance and access activity.
- Processed datasets using Python and SQL for KPI tracking and reporting.
- Integrated REST APIs between dashboards and backend services.
- Built frontend analytics components using Next.js for access activity visualisation.

AskMeldentity

AI Developer Intern

Jul 2025 – Nov 2025

Bangalore, India

- Automated IAM workflows using n8n for internal access management, replicating provisioning and de-provisioning lifecycle processes.
- Implemented authentication and authorisation flows using industry-standard federation protocols (OIDC and OAuth 2.0).
- Integrated Microsoft Entra ID with a React Native application for enterprise SSO.
- Worked with RBAC, provisioning, de-provisioning, and identity lifecycle concepts aligned with IGA best practices.

Projects

iTrace – Identity Security Assessment Platform

2026 – Present

Next.js 15, TypeScript, PostgreSQL, Firebase Authentication

<https://github.com/AnilChettri/iTrace>

- Developed a web platform to assess organisational identity security posture across domains including IGA, PAM, authentication, cloud security, and ITDR.
- Implemented assessment questionnaires mapped to compliance frameworks for governance evaluation and risk scoring.
- Integrated Microsoft Entra ID with OIDC using Firebase Authentication for enterprise SSO.
- Developed an AI assistant using retrieval-augmented generation (RAG) to provide identity security recommendations.
- Implemented role-based access restrictions aligned with IAM governance concepts.

LUMORA – AI Wellness Platform

2025

React, TypeScript, Express.js

<https://github.com/AnilChettri/LUMORA>

- Developed a full-stack wellness platform with mood tracking, guided breathing exercises, journaling, and wellness support features.
- Built reusable React components and protected API routes using session-based authentication.
- Integrated Web Audio API for breathing guidance and meditation audio feedback.
- Structured frontend and backend modules using TypeScript and component-based architecture.

Krishi Bandhu – Smart Crop Advisory System

2025

Python, Machine Learning, REST APIs

<https://github.com/AnilChettri/Krishi-Bandhu>

- Developed a crop recommendation system using soil, climate, and market datasets.
- Integrated weather APIs and preprocessing pipelines to improve prediction quality.
- Evaluated model performance using validation metrics and structured testing.

Education

Sri Sairam College of Engineering

2022 – 2026

B.E. in Artificial Intelligence and Machine Learning — CGPA: 8.43 / 10

Bangalore, India

Coursework completed; degree certificate awaited.

Certifications & Achievements

- **SailPoint Leader: Identity Security** – SailPoint (2026)
- **NHI Fundamentals** – OASIS (2026)
- **Identity Security Certified Administrator** – CyberXdelta (2026)
- **ISC2 CC Course Conclusion & Final Assessment Validation** (2026)
